GEN II

INBOARD SERIES

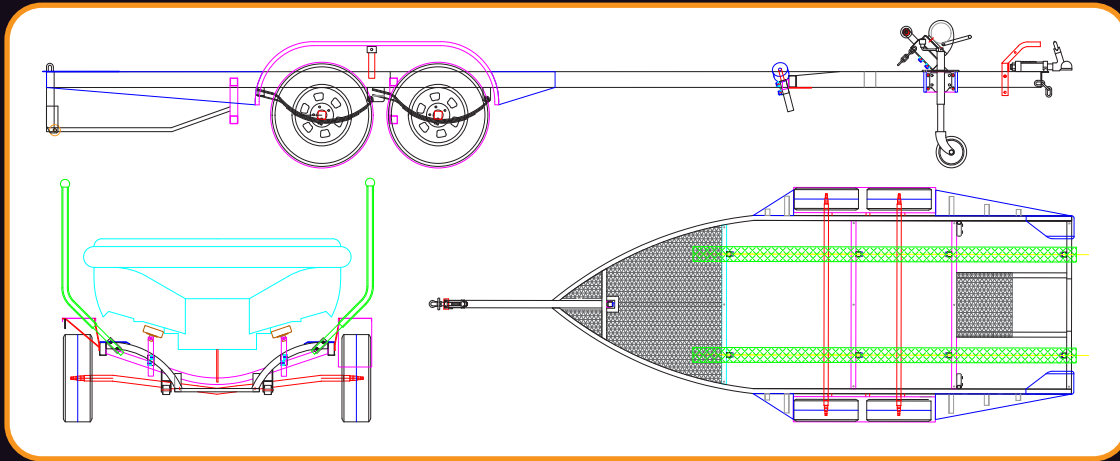

WWW.MACKAYTRAILERS.COM

ENGINEERED TO PERFECTION

The perfect inboard trailer is a combination of style, function and practicality. Protecting your hull is critical and understanding that 'function' is just as important as 'form' has been our philosophy in the re-engineering of the Mackay Inboard Series.

By listening to our customers and working with some of the best ski and wake boat manufacturers in the country we have completely revolutionised what the market says is a 'Simple Inboard Trailer'. The result is a product range that sets itself apart from the competition.

Introducing the Mackay Gen II series inboard range, without doubt the Ultimate in Inboard Trailer performance, proudly manufactured right here in Australia.

SMARTER

XL PIVOTING SKIDS

Trailer skids are the critical contact point with your hull. They must protect the surface of the hull, provide structural support to prevent distortion and damage, and guide the hull onto the trailer when retrieving.

The Gen II features oversize horizontally mounted skids that increase the contact area by up to 50% over competitors and spread the hull weight more effectively. Gen II also features our unique Pivoting Head Adjustable Mounting System so we can follow the contours of your hull perfectly, creating effortless launch and retrieve at the ramp.

We also fully encase the skid in HD Marine carpet and pin it in place, unlike basic trailers that glue a partial covering over the skid that quickly wears.

GROUND CLEARANCE

Inboard trailers must balance keeping the hull low for launch and retrieving, and maximising ride height to prevent the massive 'Road Strike' damage that occurs when the trailer hits the ground, ramp or driveway.

The Gen II cradles the boat lower in the frame than competitors thanks to some smart design engineering, while increasing the trailer ride height to give better clearance and prevent 'Road Strike'. Simply look at the rear of a Gen II vs any inboard trailer on the market and you immediately see the difference.

STEEL MESH PROP GUARD

To get to the best ski and wake destinations you have to travel, and often on second rate or even gravel roads to get to the water.

Prop and shaft damage when trailering is all too common. To combat this the Gen II series incorporates an all-new steel mesh prop guard that stops damage from debris, stones, gravel and even grounding the trailer out on rough bush tracks up the river. It's another feature that sets us apart from the rest.

THE TOUGHER, SMARTER AND STRONGER WAY TO COAT YOUR TRAILER

Mackay Trailers utilises one of the most advanced, rugged, and corrosion-resistant processes available to colour-coat your trailer. Performance Coating System (P.C.S.) is a unique process that is perfect for life under the Australian sun. The 5 stage plastic polymer coating process is vastly superior not only to painted trailers, but out-performs standard galvanised trailers as well.

Engineered to withstand years of harsh treatment you will not find a better performing coating system for trailers in the market. The tough, thick, polymer coating is baked on for maximum adhesion and with a fully galvanised frame underneath you are guaranteed to get maximum corrosion resistance.

Used on everything from steel bridges to lighthouses, P.C.S. is designed to outlast all other options. Check out the Mackay website to find out more on P.C.S.

P.C.S. is simply a smarter, stronger and tougher solution... So don't just settle for an inferior paint job.

Available in Midnight Black or Arctic White.

FULLY SEAM WELDED FLUSH MOUNT SIDE STEPS

The Gen II features massive flush finished side steps that provide a huge working area when at the ramp.

Fully seam welded they form part of the structure of the frame and provide the perfect platform. Ideal for fitting marine non-skid panels, decorative checker plate, or simply leave them as is. You will love the additional area every single time you launch and retrieve, load gear at the ramp or climb in and out at home.

STEEL GUARD INFILLS WITH EMBOSSED CARPET PADS

All Gen II trailers feature as standard welded steel mudguard guard infills and a steel infill panel behind the guards to prevent stone strike or more serious damage to your hull should a tyre failure occur.

Fitted to this are our signature embossed carpet pads to prevent accidental damage and enhance the street appeal of your trailer at the ramp.

WINCH POST SYSTEM

Our winch post system incorporates a host of features in a slim, compact design that looks great and delivers a heavy-duty base to secure your boat.

The base assembly is fully adjustable and custom machined to suit a range of swing jockey wheels.

It's fitted with a high-grade poly roller system to prevent damage to your hull when under tow.

THE GEN II RANGE

SUITS BOATS UP TO (M)	5.30	5.30	5.70	6.30	6.50
MAXIMUM WEIGHT (KG)	1450	2000	2000	2000	2000
WHEEL SIZE	14"	14"	14"	14"	14"
WHEEL BASE	Single	Tandem	Tandem	Tandem	Tandem
TYRE SIZE	185 x 14"	185 x 14"	185 x 14"	185 x 14"	185 x 14"

OPTIONS

CHECK OUT OUR RANGE OF ACCESSORIES AND OPTIONS DESIGNED TO TAKE YOUR GEN II TO THE NEXT LEVEL

PRIMAL ALLOY WHEELS
Maximum street appeal, multiple colour code inserts available, heavy duty rated.

PERFORMANCE COATING SYSTEM (P.C.S.)
Available in shadow black or arctic white, over your galvanised frame.

SWING DRAWBAR
Reduce your storage footprint on-site with a certified modification ex factory.

FULL ROLLER OUTBOARD OPTION
Maximise launch and retrieve at all boat ramps, regardless of water depth and conditions. Drive on, drive off... Simple.

ELECTRIC BRAKING
Upgrade your tow rating to 2600KG for maximum gear stowage on the road.

INFILL PANELS
Either heavy duty steel mesh or marine carpeted panels in half or 3/4 trailer.

GUARD GRIP
Aluminium checkerplate or rubber marine matting for non-skid action.

ENGINEERED TO PERFORM

Take a closer look anywhere and you will notice subtle differences in what we do. Maybe it's the additional bracing on every cross member, the tapered drawbar, sheathed wiring looms, the heavy-duty tie-down points, the dual bow rollers, the standard galvanising or maybe it's our state-of-the-art Performance Coating System.

The Gen II series of inboard trailers simply sets us apart from the competition. Looking shiny in a showroom is the easy part. **Engineered to perform - that takes a lot more work.**
