

# Custom Built Trailers by Mackay

## PLANT TRAILERS

### ***Mackay's Lightweight Hybrid Plant Trailer Combines Aluminium with Hot Dip Galvanised Steel***

*This ensures the lightest and strongest combination of materials and best function. The single piece rolled steel frame lengths are shaped through a rolling process and therefore require no welding, which acts as a strength to significantly reduce the risk of cracking. Compared to pure aluminium trailers, steel works as a better material for handling impact and fatigue without failure, and performs better in rough settings. The hot dip galvanised frame and parts protect against corrosion and look great a in the long term (no rust). The lightweight model is low to the ground, has a GVM of up to 2.6T and weighs less than 500 kg. The trailer can be custom tailored to best fit each customer's requirements.*

## Specialised Fabrication and Custom Trailers

### **CUSTOM TRAILERS AND FABRICATIONS...**

*With top engineers on site, Mackay are able to create custom-made trailers best fit your needs & requirements, through the use of state of the art resources & materials. For example:*

- *GVM capacities from 749kg up to 10,000kg*
- *Manufactured in aluminium or galvanised steel*
- *Created to suit your tasks*
- *An experienced team knowledge behind braking systems, such as: mechanical, electric, hydraulic and S-Cam.*
- *Ability to register trailers*
- *Fabrications can include skids, gates, specialised fencing, and various complex items.*

### **CORE CAPABILITIES...**

*Mackay can fabricate only, or design and fabricate according to your requirements, and provide a complete end-to-end service. Services include:*

- *Design utilising AutoCAD*
- *Cut, Drill, Press, Roll, Punch and Shear etc or a*
